About The Transplantation Society

The **Transplantation** Society

TTS 2024 Council Meeting

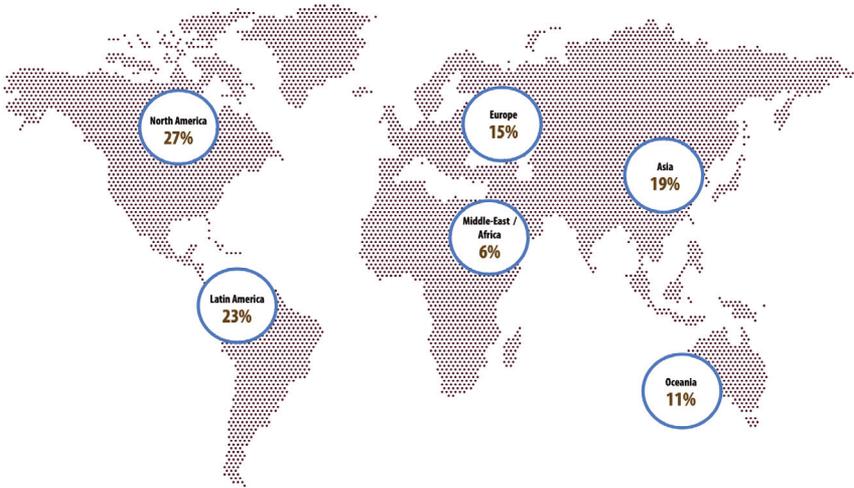

Advancing Transplantation. Transforming Lives.

The Transplantation Society (TTS) is the world's leading organization dedicated to advancing the science, practice, and ethics of organ transplantation. Headquartered in Canada and recognized as a registered charity in the United States, TTS has been a global force for nearly 60 years—shaping the field and saving lives through research, education, and advocacy.

Our mission spans the full spectrum of transplantation, from basic science and clinical care to ethics, policy, and global health equity. With a uniquely international focus, TTS is especially committed to expanding access to transplantation in low- and middle-income countries—ensuring that no patient is left behind due to geography or economic status.

With a vibrant network of over 5,000+ professionals in 105 countries, and a broader community of over 20,000 engaged stakeholders, TTS serves as the global voice of transplantation. Our members—physicians, surgeons, scientists, and allied healthcare professionals—volunteer their expertise to advance the field while delivering life-saving care daily.

TTS - By the Numbers

5,000+  Members

Why Partner with TTS?

John J. Fung, USA
President

Nadey Hakim, UK
President-Elect

Elmi Muller, South Africa
Immediate Past President

By supporting TTS through sponsorship or philanthropic investment, you directly contribute to:

- **Advancing science** that leads to breakthrough treatments and improved patient outcomes
- **Empowering professionals** through high-quality education, training, and shared global expertise
- **Championing ethical practices** and **expanding access to transplantation** for patients worldwide
- Amplifying the voices of organ donors, recipients, and their families in **shaping compassionate, patient-centered care**

We are seeking visionary partners to support essential programs and initiatives that improve quality, safety, and access to transplantation —while developing the next generation of leaders in the field.

Explore the opportunities in our Sponsorship Prospectus to discover how your support can help drive lasting, global change.

*– Thank you for reviewing this prospectus,
sharing what interests you and what ideas you have! –*

Sponsor Benefits

TTS sponsors can benefit from:

- **Enhanced Brand Visibility:** Increase your organization's visibility among a global network of transplant professionals through targeted marketing efforts and branding opportunities at TTS events and platforms.
- **Education Leadership:** Showcase your organization's commitment to the transplantation field by supporting, collaborating on educational programs, conferences, and research initiatives.
- **Networking and Collaboration:** Connect with renowned transplant professionals, key opinion leaders, and industry experts to foster collaboration and expand your network within the transplant community.
- **Showcase Your Organization:** Opportunities to showcase products and services at TTS events and conferences.
- **Advance the Field:** Opportunity to support the advancement of transplantation science and practice worldwide.
- **Customized Engagement:** Tailor sponsorship packages to meet your organization's specific goals and budget. We offer various sponsorship levels and opportunities for customization to maximize your benefits.

– What is important to you? –

TTS Global Sponsorship

The Transplantation Society (TTS) invites leading organizations and committed philanthropists in the field to become Global Sponsors in Transplantation—a premier opportunity to demonstrate enduring leadership and commitment to the advancement of transplantation worldwide.

As a Global Sponsor, you/your organization will gain sustained global visibility, exclusive benefits, and the chance to shape the future of transplantation alongside the field's foremost leaders and innovators.

Sponsorship Tiers & Benefits

Enhanced Digital Presence for Global Sponsors

Website Recognition: Sponsors featured via a dedicated link in the Quick Links section of the TTS homepage, directing visitors to a Global Sponsorship page with sponsor profiles and details.

Platinum Global Sponsor

\$75,000 USD/year (Minimum 2-year commitment)

- Premium recognition on the TTS website and weekly newsletters
- Four (non-product) advertisements annually in our widely circulated newsletter
- 15% discount on TTS Congress sponsorship package and additional opportunities
- Two complimentary TTS Associate Memberships
- Sponsorship of two global TTS webinars
- Naming rights for one TTS Recognition Award

TTS Global Sponsorship

Gold Global Sponsor

\$50,000 USD/year (Minimum 2-year commitment)

- Prominent visibility on the TTS website, weekly newsletters, and annual report
- Two (non-product) advertisements annually in the TTS newsletter
- 10% discount on TTS Congress sponsorship and selected opportunities
- One complimentary TTS Associate Membership
- Sponsorship of one TTS webinar
- Naming rights for one TTS Recognition Award

Silver Global Sponsor

\$25,000 USD/year (Minimum 2-year commitment)

- Recognition on the TTS website (with a link to your organization), newsletters, and annual report
- One (non-product) newsletter advertisement annually
- 5% discount on Congress sponsorships and selected items
- One complimentary TTS Associate Membership
- Sponsorship of a TTS Recognition Award

*– Join us today to elevate your influence,
visibility, and impact. –*

Congress Sponsorship

The TTS Biennial Congress and TTS Sections have dedicated Congress sponsorship opportunities. Current industry prospectus(es) are available.

The TTS Congress is the largest international meeting of transplant professionals, held every two years. As a sponsor, your organization can exhibit at the congress, sponsor scientific sessions and symposia, and host networking events.

For TTS 2026 please download the prospectus at:

<https://tts2026.org/sponsor>

The poster for TTS 2026 features a background image of a modern building with a glass facade and a bridge in the distance. A large blue ribbon graphic curves across the center, containing the text "INVITATION TO INDUSTRY" and "The largest global transplantation congress of the year!". The ribbon also displays the website "www.TTS2026.org" and the Australian flag. At the top, the TTS 2026 logo is accompanied by the tagline "Innovation through Collaboration" and the text "31st International Congress of The Transplantation Society". Logos for partners like TSANZ, Sydney NSW, and Business Systems Australia are also present.

60 TTS2026 SYDNEY AUSTRALIA September 20-23
31st International Congress of The Transplantation Society

INVITATION TO INDUSTRY

The largest global transplantation congress of the year!

Organized in partnership with **TSANZ**
Supported by **sydney NSW** **BUSINESS SYSTEMS AUSTRALIA**

Awards, Grants and Fellowships

TTS' Awards Committee regularly reviews its awards program to accommodate further opportunities to recognize and inspire excellence, either as TTS Awards or joint awards with other societies and organizations as aligns to TTS' mission.

Award sponsors are denoted in marketing and promotions, during events and on recipient award certificates.

See historical award winners here: www.tts.org/tts-about/tts-awards-grants

Named Awards

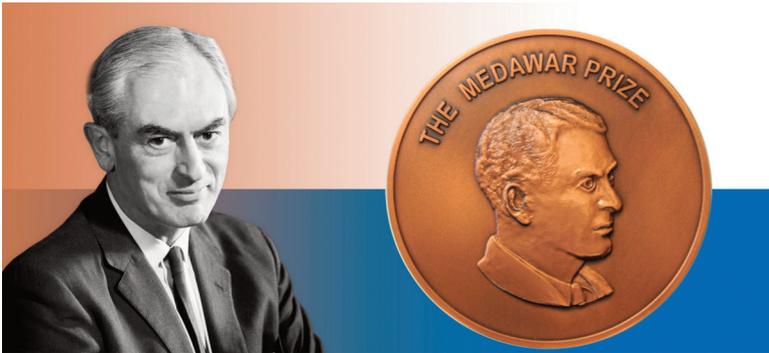

TTS may consider named awards where interests align and endowed funds are provided.

– What do you think is important to recognize and inspire within the field of transplantation? –

TTS Medawar Prize

\$50,000 USD (\$25K/award based on estimated 2 awards/year)

The Medawar Prize, named after Society co-founder Sir Peter Medawar, is recognized as the world's highest dedicated award for the most outstanding contributions in the field of transplantation.

Awards, Grants and Fellowships

Medawar Prize – Past Laureates 1990-2024

1990	 James Gowans	 Jaques FAP Miller	2006	 Carl G. Groth	 Pekka Häyry	 Sir Peter J. Morris	
1992	 Sir Roy Calne	 Norman Shumway	 Thomas E. Starzl	2008	 Jean-Michel Dubernard	2010	 Clyde F. Barker
1994	 Rupert E. Billingham	 Leslie Brent	 Morten Simonsen	2012	 David E.R. Sutherland	2014	 David H. Sachs
1996	 Jean Dausset	 Paul I. Terasaki	 Jon J. Van Rood	2016	 Jean-Paul Souillou		
1998	 Felix T. Rapaport	 Anthony P. Monaco	 Fritz Bach	2018	 Megan Sykes	 Kathryn Wood	
2000	 Ray D. Owen	 Robert Schwartz		2020	 Francis L. Delmonico	 Anthony P. Monaco	
2002	 René Küss	 Joseph E. Murray	 Georges Mathér	2022	 Jeremy R. Chapman	 Manikkam Suthanthiran	
2004	 John S. Najarian	 Paul S. Russell	 Richard L. Simmons	2024	 Ronald W. Busutil	 Mehmet Haberal	 Shaf Keshavjee

Awards, Grants and Fellowships

TTS Thomas Starzl Innovation Award

\$10,000 USD

The TTS Starzl Innovation Award is named after Thomas Starzl. The award recognizes individuals who, through advanced and original work, have contributed significantly to transplantation, thereby reflecting the spirit pioneered by Dr. Starzl.

Past Laureates 2020-2024

2020

Andreas Tzakis

2022

Jan Lerut

2024

Robert A. Montgomery

Awards, Grants and Fellowships

TTS Recognition Awards

\$2,000 USD per Award

TTS has traditionally offered 4 such awards:

- Outstanding Achievement Award in Transplantation: Basic Science
- Outstanding Achievement Award in Transplantation: Clinical
- Outstanding Achievement Award in Transplantation: Developing Country
- Mentorship or Education and Training Award in Transplantation

TTS Outstanding Achievement Award in Transplantation - Basic Science

Honors researchers or research teams that have made ground breaking discoveries or advancements in the field of transplant basic science research.

Outstanding Achievement Award In Transplantation - Clinical

Honors individuals researchers for their significant contributions and exceptional dedication to advancing the field, improving patient outcomes, and revolutionizing clinical transplantation practices.

Outstanding Achievement Award in Transplantation - Developing Country

Honors individuals for their significant contributions and exceptional dedication to advancing the field, improving patient outcomes, and revolutionizing transplantation practices in low and low-middle income countries.

Mentorship or Education and Training Award in Transplantation

Recognizes outstanding mentors who have provided guidance, support, and inspiration to trainees and junior healthcare professionals. This award highlights the importance of mentorship in career development and encourages a culture of mentorship within the medical society.

Awards, Grants and Fellowships

TTS Congress Mentee-Mentor Awards

\$500-2500/award based on travel costs to Congress

The Transplantation Society celebrates the contributions of basic science to the field of transplantation with the International Transplantation Science Mentee-Mentor Awards to recognize the efforts of established transplantation scientists fostering the development of the young investigators who will be the future leaders of the field.

TTS Congress Scientific Awards

\$500-2500/award based on travel costs to Congress

The Transplantation Society provides travel grants for early career, allied health professionals and transplant professionals from emerging economy countries with high scoring accepted abstracts for presentation at TTS and Section Congress(es).

Please refer to the TTS Biennial Congress and Sections sponsorship prospectus(es).

Other Awards & Grants may be considered by the Awards & Grants and/or Fundraising Committee as opportunities arise.

These awards are also represented in each Congress' prospectus.

Awards, Grants and Fellowships

TTS Journals' Awards

\$2,000 USD per award

Leslie B. Brent Award

Awarded annually for the most outstanding paper published in Transplantation in the field of Basic Science research

Anthony J. Monaco Award

Awarded annually for the most outstanding paper published in Transplantation in the field of Translational Science research

Other Awards & Grants may be considered as suggested by the Journals or others or considered as opportunities arise.

– What do you want to honour and inspire within the field of transplantation? –

TTS Research Grants

\$50,000 USD per grant

TTS provides funding to up to three individual investigators to support their research in transplantation. The spectrum of studies includes basic, clinical/epidemiological and translational. The recipient should have spent five years or less performing research in transplantation (and/or immunology relating to transplant) since obtaining their last doctoral degree (PhD, MD, PharmD, or equivalent). One of these research grants will be preferentially designated to TTS members from a low- or middle-income country.

– Help develop the next generation of organ donation and transplantation researchers today! –

TTS Research Grants Program

Awards, Grants and Fellowships

TTS Paired Liver Transplant Centers Program

up to \$61,000 per pair

Building on the historic TTS-ILTS initiative the TTS Paired Transplant Centers Program supports the development of new liver transplant programs in emerging economies by pairing an experienced liver transplant center (the supporting center) with an emerging liver transplant center (emerging center) to facilitate vital multidisciplinary training and an exchange of knowledge and expertise. The program involves progressive steps with a progressive allocation of funds with the goal of graduating emerging centers becoming centers of excellence for regional training and support.

- Level 1 pairs receive an annual allocation of maximum \$3,500 USD
- Level 2 pairs receive an annual allocation of maximum \$12,000 USD
- Level 3 pairs receive an annual allocation of maximum \$15,000 USD

Each pair is in each level for 2 years. If a pair is successful in the program the pairs will have up to: \$61,000 over a 6 year period, should the pairs be successful in attaining annual objectives.

– Help develop a liver transplant program in a low-middle income country! –

ISN-TTS Sister Kidney Transplant Centers Program

up to \$48,000 per pair/trio

The ISN-TTS Sister Transplant Centers (STC) Program is a joint partnership set up between ISN and The Transplantation Society (TTS) to create new kidney transplant centers and develop existing kidney transplant programs in emerging economies.

- Level C pairs receive an annual allocation of maximum \$2,000 USD
- Level B pairs receive an annual allocation of maximum \$10,000 USD
- Level A pairs receive an annual allocation of maximum \$12,000 USD

Each pair is in each level for 2 years. If a pair is successful in the program the pairs jointly have up to \$48,000 in funding over a 6 year period, should the pairs be successful in attaining annual objectives.

– Help develop a kidney transplant program in a low-middle income country! –

Awards, Grants and Fellowships

TTS-ISN Kidney Transplant Fellowship Program

TTS & ISN have jointly developed a fellowship program that provides between \$16k to \$28k of funding for short (<6 months) or long term (<1 year) for young physicians or surgeons from low resource areas to receive hands-on training in advanced host institutions to acquire state-of-the-art knowledge in transplantation.

Other fellowships programs are possible as opportunities arise.

– Train a transplant fellow from a low-middle income country to return to their country with the skills needed to practice in their home country! –

Travel Grants

Variable pricing

Sponsor scholarships and travel grants enable deserving individuals, especially from allied health professionals and members from low resource countries and underrepresented regions, to augment holistic healthcare team collaboration and representation at TTS educational events and conferences.

Travel grants also enable TTS to send leading experts and representatives to regional and national meetings to provide topical insights and facilitate global collaboration

– What is your interest and how do you want to bring experts together? –

**The Transplantation Society and
the International Liver Transplantation Society**

Paired Transplant Centers Program

Education

As a corporate sponsor, your organization can support and participate in TTS educational programs. TTS will be responsible for all or most the aspects of the activities including but not limited to: program development, speaker invitations, CME coordination, (where required), marketing (through email direct marketing in our weekly newsletter to over 22,000 stakeholders in the field of transplantation, social media, and other channels) logistical coordination and full execution including recordings for ongoing access.

Webinar Sponsorships - Individual or Series/Packages

\$15,000 USD per / 2 for \$25,000 / 5 for \$50,000 USD

TTS's Education Committee will collaborate to facilitate engaging and informative webinars that highlight the latest trends, innovations, and research findings in the field of transplantation. By joining forces, TTS and our sponsor can leverage their expertise and resources to create an exceptional learning experience for participants.

Asynchronous Learning Activities*

Pricing to be discussed.

TTS has run many self-paced, independent, asynchronous programs in multiple languages. The delivery can be tailored to meet specific goals. Examples are:

- Courses, where there is some interaction between the learner and faculty
- Curricula where learners complete material to receive a certificate
- TTS also has the capability to include pre and post-tests within our projects

– Help educate the transplant community! –

Education

Organ and Donation Transplantation Educator Training Program

Program estimate: \$120,000. Opportunities to sponsor individual attendees or speakers are also available

This initiative is a two-day educational course designed to train 30 transplant professionals to become ODT educators. This in-person educational program will equip junior transplant professionals from LMICs with essential teaching skills, helping them become effective educators within their respective countries. The training will be open to physicians, surgeons, allied health professionals, coordinators, researchers, patients, and patient group representatives. The course will be delivered by expert faculty from TTS's global network, and all presentations will be recorded for future online availability via the TTS website.

– Help educate the transplant community by equipping them with essential teaching skills. –

In-Person and/or Hybrid Meetings

Cost to be confirmed

TTS has the unique ability to organize global, regional and local Topical Sessions, Workshops, Consensus Meetings, Key Opinion Leader Meetings, Emerging Leader Meetings, etc. Our committees, experts, meeting planning experts and technical team produce high-quality, engaging and productive events.

– Help educate the transplant community by equipping them. –

TTS transplant development in LMICs

TTS is regularly sought after to facilitate program and system development and improvements in low-and middle-income countries. Support provided enables expert exchange through structured activities and multi-year capacity building collaboration.

– Help advance access to quality organ transplantation around the world. –

Global Consensus Guidelines Development

Global Consensus Guidelines Development

Cost to be confirmed

TTS can organize Topical Workshops, Consensus Meetings, Key Opinion Leader Meetings, Emerging Leader Meetings, etc. TTS's Committees, experts and our meeting planning services and technical team produce high-quality and meaningful events.

Current Guidelines Development and Consensus activities seeking funding include:

Molecular Diagnostics Consensus Guidelines development

Variable opportunities for grants to further this initiative and support a consensus meeting.

TTS experts, including senior advisors Phil O'Connell, Roslyn Mannon, Maarten Naesens and Camille Kotton are leading the development of recommendations to support research to the implementation of molecular diagnostics in transplantation.

Summarise current state of the field with respect to key domains of:

- Diagnostic molecular tests: genetic testing, detecting rejection and detecting over immunosuppression (metagenomics)
- Predictive molecular tests and surrogate end-point use: acute transplant dysfunction (rejection and non-rejection pathology) and chronic dysfunction
- Identification of key barriers and areas of need in key domains, and stage of development
- Standardization of reporting of metrics and study outcomes, important for reproducibility and future regulatory considerations
- Unification of research efforts and resources towards common goals/areas of need

– Help define consensus on next steps in molecular diagnostics research and application. –

Global Consensus Guidelines Development

Perfusion Guidance

Variable opportunities for grants to further this initiative and support a consensus meeting.

TTS is in the initial planning phase of developing a global work group to address and provide guidance on the preponderance of development in the field of perfusion.

– Bring consensus to the current status of organ perfusion. –

Global Data Harmonization Consensus Initiative

Variable opportunities for grants to further this initiative and support a consensus meeting.

In 2023, The Transplantation Society (TTS) launched the Global Data Harmonization initiative to define effective and high-performing ODT registries. Visit the Global Data Committee page at www.tts.org/tts-about/tts-committees/global-data

By engaging global experts consensus-based benchmarks for registry development, governance, reporting, and use. Is being developed. A central output will be a practical “maturity model” to help ODT systems worldwide evaluate and improve their registry infrastructure.

The ultimate goal is to harmonize data across countries and enable global collaboration—driving smarter policies, better outcomes, and more equitable access to transplantation.

– Help establish the global standard for registry excellence and transform transplant care around the world. –

Women in Transplantation

Women in Transplantation (WIT)

www.tts-wit.org

WIT Awards

\$2,000 USD per award; multiple awards may be granted each year at TTS Congresses.

WIT Woman Leader Awards

Recognizing women who have helped further the field of transplantation through research, policies, leadership, initiatives or other regarded contributions.

WIT Unsung Hero Award

Recognizing women who have had an extraordinary impact in transplantation through community service, volunteering, mentorship or other community-based activities.

WIT Research Fellowships

Up to \$50,000/two year award

WIT funds a variety of research fellowship and research grants in the range of \$25,000-\$50,000/two year award.

See WIT's current grants & fellowships here:

www.tts-wit.org/research-grants/wit-research-grants-awardees-2024

WIT Networking Events

\$5000/event

WIT actively engages with participants at major congresses within the field by holding networking sessions, scientific symposia, and expert panel discussions—focused on the critical and growing area of sex and gender in transplantation and supporting leadership development.

Grants of \$5,000 have a meaningful impact, helping to cover essential costs such as venue rental, catering, promotional materials, and occasional speaker travel. These contributions directly support WIT's mission to foster inclusivity, advance gender-related research, and create valuable platforms for collaboration within the field.

– Advance sex and gender equity in organ donation and transplantation –

Declaration of Istanbul

Declaration of Istanbul Custodian Group (DICG) Global Outreach

DICG International Speaker Series

Funds support DICG sessions at regional meetings around the world focusing on implementation of the Declaration of Istanbul to combat organ trafficking, transplant tourism and transplant commercialism to encourage adoption of effective and ethical transplantation practices around the world.

Learn more about the DICG here: www.declarationofistanbul.org

– Help stop organ trafficking! –
